Everything Explained

Links:

You get 900 links that we build via forum profiles on sites with a domain page rank of at least 4. You get a total of 180 profiles; each one has 5 anchor text links to your site. We also do a little web 2.0 link building with comments but these are not included in the report as they can take some time to be approved. These links are as well as the 900 links you receive via the forum profiles.

URL:

You can have ANY URL as long as it is a valid page; this could be video, articles or a page on your site.

Keywords:

The keywords can be any keyword you like; you choose a keyword for each URL.

Backlink boosting:

We build links to each page that contains links back to your site, this is where our service kills other similar services on the market.

We build 5 links to each page that contains backlinks to your site, this reduces the time it takes for backlinks to be indexed and increases the number of backlinks that are picked up by the search engines.

Link Report:

You will get a report that details all the links we build at your site. A report will look something like this:

	A	B	C	D	E	F
1			Site to link to			
2			keyword			
3	Gmail	username	password	URL		
4						
5						
6						
7						
8						
9						
10						
11						
12						
13						
14						

You will receive one for each different URL that you request backlinks to be built for.

RSS Of Links:

We take the links that have been created and put them all into an RSS page, we use your keywords to create relevant titles and descriptions. You can use this RSS feed in RSS directories although we do submit the Feed to 12+ RSS directories as part of the service.

Contact Details:

You will also get my personal Email and Skype should you have any questions or just want to chat about your project, I'm always happy to talk with clients about their sites, the weather or whatever's on your mind.
